# Invitation

Asian Polymer Association (APA) is a professional society dedicated to the science of polymers. APA has organized several conferences at the international forum and has created a highly interacting platform for the polymer scientists. APA is organizing its next International conference (APA-2023) on Polymers for Advanced Technology in Goa, India to address the priorities and to formulate the action plan to face the challenges ahead. The conference would be dedicated to the polymer science and technology with an extensive interaction among academicians, researchers, technologists and policy planners. We have special symposiums on different topics organised by APA Bioforum, APA Nanoforum and APA Sustainability Forum. A special feature of this event is to organize Student Conclave for the benefit for our young generation. We are sure that this conference would provide us required impetus in generating polymer resource for the country. On behalf of APA, we would like to invite you to participate in this conference and we look forward to welcoming you in Goa.
